

Turn-Key BDR

Endpoint Backup

Public Cloud Backup

Having a good **managed backup solution** is **essential** for any business.

CCS can evaluate your backup needs and provide a solution that fits your data, whether it's on-premise, in the cloud, or hybrid. A comprehensive backup solution ensures business continuity and protects against data loss incidents.

With a full BDR (Backup and Disaster Recovery) system for on-premises servers, direct-to-cloud backup for remote devices, and cloud-to-cloud backup for Microsoft or Gsuite data, your business will have a multi-layered approach to data protection.

Appliance Based Backup & Disaster Recovery

- 99.999% uptime
- Recover Files and Folders or Full Recovery
- Instant Recovery to Local Appliance
- Cloud Disaster Recovery Automation to Quickly Deploy and Access
- Never Reseed even after roll back

An appliance-based backup solution is a great way for businesses to protect critical servers and PCs. It allows quickly restore their data in case of a hardware failure, keeping the business running smoothly. These backups are stored both locally and, in the cloud, for fast recovery times and disaster recovery.

EndPoint Backup – Direct to Cloud

- No Appliance Required
- Protect remote endpoints
- Backup from internet source every 15 minutes
- Backup direct to cloud from PC, Laptop, Server
- Backup Servers in Azure, AWS or Google Cloud

Businesses should back up all critical devices, including those used by remote employees, to protect against data loss. Direct-to-Cloud backup is a strong shield against ransomware and hacking. It uses several features to keep your backups safe and allows for quick recovery if something goes wrong. This gives businesses peace of mind knowing they can get machines back up and running quickly.

Cloud to Cloud

- MS 365 – Exchange Mail, Calendar, contacts, OneDrive, SharePoint, teams data
- Google Workspace – Gmail, calendar, Contacts, drives, shared drives

Businesses need to back up their Microsoft 365 and Google Workspace data in the cloud to protect against data loss from hacking, accidental deletion, or even unhappy employees. This automatic backup ensures your emails, calendars, files, and other data can be recovered quickly if something goes wrong. Having one solution from CCS can back up both Microsoft 365 and Google Workspace data, keeping your business running smoothly.

ECOSYSTEM FEATURES

Chain-Free Backup	Eliminates the need to reseed and ensures that there are no chains to break.
Auto Verify	Ensures that backups are always recoverable via boot and deep volume checks.
Flexible Backup Schedules	Allows for backups as often as every 15 minutes.
Full Restore	Allows for full restore to a point in time or restore of individual files or folders.
Ransomware Protection	Air Gap technology protects backups against attackers.
Data Protection	Backups cannot be purged or deleted from backup stores.
Compliance	HIPPA and GDPR compliant with data stored in a SOC II certified data center and data remaining in the US at all times.
THE CCS DIFFERENCE!	Fractional Chief Information Officer Support*
	Onboarding & Offboarding Process Champion
	Employee Security Awareness Training
	Human Resources Employee Policy Assistance
	Branded Virtual Backgrounds*
