

CCS Technology
BRING. IT. ON.

CONSTRUCTION

Technology plays a crucial role in the construction industry. It enables efficient and accurate project planning, monitoring, and resource management. With our cutting-edge technology solutions, we can streamline your construction processes, improve productivity, and deliver projects on time and within budget.

IT MANAGEMENT AND HELP DESK

The most visible portion of IT Managed Services - We regularly exceeds 95% of Customer Satisfaction.

365 SHAREPOINT

Helping you get the most out of your 365 subscriptions. File sharing, security groups, Teams and more.

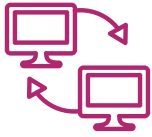

EMAIL SECURITY

Spam, phishing, viruses, account takeover and more. Email is the #1 gateway for malicious attacks and needs to be protected.

ADVANCED SECURITY

A firewall and antivirus are not enough today. We have a multi-tiered approach to reduce your risk.

LIFECYCLE MANAGEMENT

From provisioning, through operations, to retirement. Helping reduce downtime and increase productivity.

DISASTER RECOVERY

Backup is not enough. You want to respond to and recover from an event in a timely manner.

FIREWALL SECURITY

Protecting your network from outside intruders. Much like locking the front door is the first line of defense to an intruder.

END USER SECURITY TRAINING

End user mistakes are the cause of most breaches. Training your team to protect your business.

DARK WEB MONITORING

Knowing when you have new compromised passwords is the key to mitigating the risk.

COMPLIANCE

More than policies and procedures but ensuring your team is following those policies.

ENDPOINT DETECTION AND RESPONSE (EDR)

Not just detection but automated response. Leveraging automation to increase security. Detect and shutdown threats in minutes instead of hours or days.

EXTENDED DETECTION AND RESPONSE (XDR)

Beyond the endpoint but monitoring data and traffic around the network to find unusual activity at the infrastructure level.
